DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 5-9, 14-18, 21, 22, 25 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 1, lines 7-8, the newly-added limitation "and a sideways angle with respect to a machine direction (MD) of the nonwoven web" (emphasis added by examiner) is not supported by the originally-filed specification and thus, constitutes new matter. In claim 14, lines 9-10, the newly-added limitation "and a sideways angle with respect to a machine direction (MD) of the nonwoven web" (emphasis added by examiner) is not supported by the originally-filed specification and thus, constitutes new matter.

Art Unit: 1732

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3, 5-9, 14-18, 21, 22, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 7 and in claim 14, line 9, the expression "a sideways angle" renders the claims indefinite principally because it is not clear what is the meaning of this term (i.e., what type of angle is a sideways angle) and it is not clear what applicant intends to cover by such a recitation.

Response to Arguments

5. Applicant's arguments with respect to claims 1-3, 5-9, 14-18, 21, 22, 25 and 26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1732
